

How to Connect to Google Colaboratory?

1. With your Google Account logged in, open Google Drive, hit “New” and navigate to “More” and “Connect more apps”. I have already installed Colab, but you might not have that in the drop down menu.

2. Then, in the pop-up window, search for “Google Colaboratory”. Click on it.

3. Finally, hit “Install”. You may be prompted to authorize access to your account information. Give your authorization and you will be all set. (I have already installed it so it now shows “Uninstall”).)
